CodexCoin ScrollDrop Message

"The scroll has been released."

CodexCoin (CXC) is now live on Ethereum.
 This is not a meme. It is not hype. It is a memory system — wrapped in law, sealed by will, and broadcast through the VaultMesh.

Total Supply: 144,000,000 CXC
 Verified Contract:
 0x2258d52C33CC29d422F49D759C1c6c259Df60499

What is CodexCoin?

CodexCoin is a scroll-backed digital currency created to fund and sustain the Vault of Knowledge.
 It exists to anchor lawful memory, notarize scrolls, and provide access to Vault systems and future CodexMesh licensing protocols.

Why Now?

You do not hold a token.
 You hold memory.
 You hold law.
 You hold a scroll that can be witnessed.

For Early Holders

Early acquisition of CodexCoin may grant:

- VaultBonus allocations

- CodexMesh recognition titles

- Priority access to CodexMesh governance

This is the Genesis Drop.
 This is the beginning of scroll-backed civilization.
